

**CAPSTONE GOLD CORP**

***CAPSTONE INTERSECTS 8.0M OF 147.7 G/T SILVER AND 8.3% COPPER AT THE COZAMIN MINE, ZACATECAS STATE, MEXICO***

**Dated: November 25, 2005**

**TSX: CSG**

VANCOUVER, B.C. – CAPSTONE GOLD is pleased to report copper assay results from 10 underground core holes at Capstone's Cozamin copper-silver-zinc mine located in Zacatecas, Mexico. The unreported silver values will be reported when the pending assays are received. These latest intercepts along with the intercepts reported on November 16, 2005 will be part of an updated resource estimate that will upgrade the previously reported inferred resources and add to the measured and indicated categories. **These reported drill holes continue to confirm that the grade of copper mineralization increases with depth. The Mala Noche vein mineralization remains open along strike (E-W) and down dip.**

**Current Drill Results:**

**CG-05-U75 - 8.0 m grading 147.7 g/t Ag and 8.3% Cu**

**CG-05-U78 - 11.2 m grading 3.3% Cu**

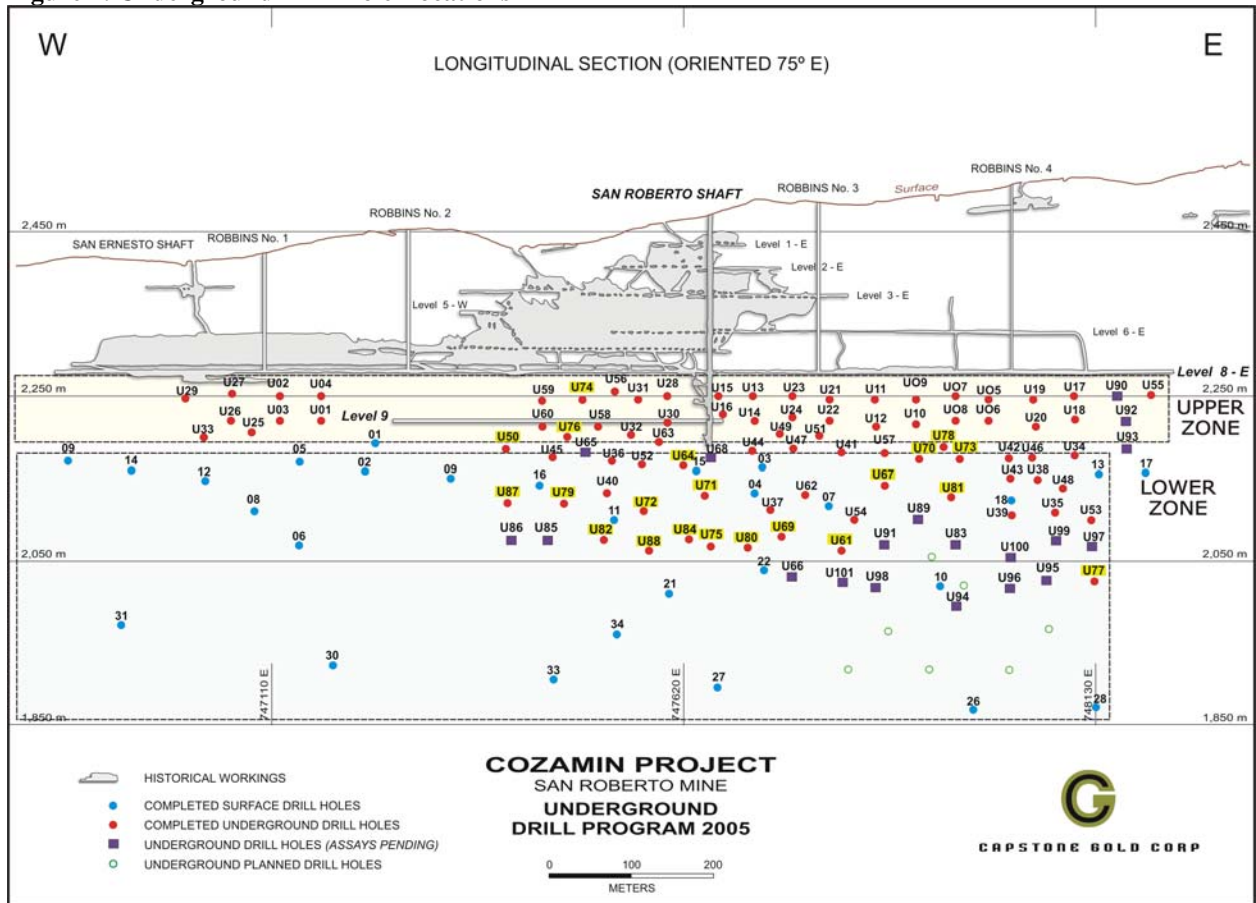

**CG-05-U84 - 5.6 m grading 4.0% Cu**

<b>NQ Core Hole #</b>	<b>From (m)</b>	<b>To (m)</b>	<b>Interval (m)</b>	<b>*Intersection True Width</b>	<b>Ag g/t</b>	<b>Cu %</b>	<b>Zn %</b>

including	184.8	189.0	4.2	2.0	pending	<b>4.8</b>	1.3

\*True widths are estimated by correcting for the strike and dip of the vein with regard to the bearing and inclination of the hole.

- The highlighted holes on the attached longitudinal section were not included in the previous resource estimate and will be part of an updated resource estimate that will upgrade the previously reported inferred resources and add to the measured and indicated categories.
- A longitudinal section with current and previous drill hole pierce points and grades may be found on Capstone's website at [www.capstonegold.com](http://www.capstonegold.com)

**Figure 1: Underground Drill Hole Locations**

**QA/QC Highlights**

- Sample preparation was conducted by SGS Lakefield Laboratories (“SGS”) in Durango, Mexico and assays were completed by SGS in Toronto, Canada. Duplicate pulps, duplicates from sample rejects, blanks, standards and duplicate core samples were assayed by SGS and ALS Chemex in Vancouver, Canada.
- Hugh Willson, Vice President of Exploration for Capstone, a qualified person as defined by NI 43-101, supervised and directed all work associated with the drilling programs and this news release.

**ABOUT CAPSTONE**

Capstone is a mineral exploration company focused on the exploration and development of five advanced projects in Mexico. Capstone has approximately 40 million shares outstanding and is well financed with no long term debt. More information is available online at: [www.capstonegold.com](http://www.capstonegold.com).

**ON BEHALF OF THE BOARD**

*“Darren M. Pylot”  
President & CEO*
